

What is Datathon Slides

Slide 1

- Explain competition & prizes

Slide 2: Why competing in Datathon

1. Work with data: Explore vast datasets to discover groundbreaking insights
2. Solve challenging problem: Use data to answer and solve socially impactful problems
3. Compete for Prizes: Win a cash prize and mock interview with companies

Slide 3: What will be the final product?

- Final Project has:
 - o 3 questions answered through visualizations
 - o At least 3 visualizations (Graphs, tables, etc)
 - o At least 1 dataset sourced at the end
 - o Some evidence of data manipulation/wrangling
- Minimum requirements:
 - o 3 Questions
 - o 5 minute presentation
 - 3 minute Judges Q/A

Slide 4:

1. Who can participate?
 - Everyone who is Lawrence student from any major
2. Participation format
 - At least 1 person
 - Max of 3 people

Slide 3: Teams

- Team format and individual
- Recommendation for choosing team (Some coding experience is beneficial, what different people and expertise to have in a team: Coding, Visualizing, Communication etc)
- How Data science helps to form group
 - + Can sign up as individual
 - + Selection based on the shared field of interest

Slide 4: Theme explanation

- Storytelling with data

Slide 5: General process

- Step 1: Choose a theme
- Step 2: Sign up to participate in Datathon, brief idea of what you want to do
- Step 3: Choose a dataset
- Step 4: Come up with question to answer
- Step 5: Data cleaning and data wrangling
- Step 6: Data analysis and data coding
- Step 7: Do data visualization

Slide 5: How to begin

- I know what I'm interested in doing, what's next?
- What if I don't know how to code?

Resources for data

- Show how to download/extract

Slide 6: Rubric – Grading and selection criteria **

- Inclusion of data-related tools (data analysis, data wrangling, data visualization)
- Innovation and originality
- Methodological rigor
- Impact and implications
- Clarity and quality of presentation
- Sustainability and ethical considerations

Slide 6: Project walkthrough *Natalia

- Talk through thought process/ work process
 - o Started in class
 - o Start early (know what you're gonna do)
- Go through entire project
- How to structure presentation

Q/A
